CAREER OBJECTIVE

Graduate in Electronics and Communication Engineering, with strong programming, data handling, and IoT systems. Example skills include Python, SQL, Javascript, and API connection, with applied learning and practical project experience. Pursuing an entry-level role as a **Data Analyst or Backend Developer** to utilize technical and analytical talents in real-world problem solving.

EDUCATION

Bachelor of Science Electronics and Communication Engineering 2022 - 2026

Bonam Venkata Chalamayya Engineering College, Odalarevu-AP

- CGPA - 7.7

Intermediate 2020 - 2022

Aditya Junior College, Kakinada-AP

- CGPA - 7.4

SSC/10th 2019 - 2020

ZPP High School, Yendapalli-AP

- CGPA - 8.53

TECHNICAL SKILLS

- **Programming** : Python, JavaScript
- **Data Handling**: SQL, Excel, Pandas, NumPy
- **Frameworks**: Flask, Django, React Js
- **Web Technologies**: HTML, CSS
- **Cloud & Tools**: AWS, Git, API Integration
- **IoT Platforms**: Arduino IDE, ESP32

ACADEMIC PROJECTS

TENG Device based Smart Hill Road Safety and Traffic Management System

- Designed an IoT-based system to monitor hill road traffic conditions.
- Built with ESP32, TENG sensors, and a web-based real-time dashboard.
- Improved safety through local WiFi-based communication (works without internet), ensuring reliability even during poor weather.

My Personal Portfolio Using Full-Stack

- Created a personal portfolio website to display my works and skills.
- Used HTML, CSS, and JavaScript on the front end to make the webpage interactive and user-friendly.
- Built the back end with Python using Flask to manage form entries and update content as needed.
- Added an SQL database to keep track of user messages and project information.

INTERSHIPS

IoT & Frontend Intern | National Institute of Technology,Warangal May 2025 - June 2025

- Worked on **IoT systems** with Arduino IDE and ESP32.
- Built interactive dashboards using HTML, CSS, Javascript

Full-stack Development | International Institute of Digital Technologies April 2024 - May 2024

- Created a **personal website** to display my abilities and work.
- Built a responsive front-end using HTML, CSS, and JavaScript, and set up a strong back-end with Python, using SQL to manage and organize data effectively.

CERTIFICATES

- Full Stack Development Certified by International Institute of Digital Technologies.
- Smart Hill Road Safety and Traffic Management System Certified by NIT Warangal.
- Programming for problem solving using C and Python Certified by CodeTantra.
- AWS Academy Cloud Foundations & Cloud Developing Certified by AWS Academy.
